

Summer is almost over but we hope you are still enjoying the sunshine wherever you are!

Despite the holiday period, the Resmyle partners have been hard at work preparing the next project activities. A big thanks to you and to all young NEETs and local contributors who have taken part in our international workshops and eco-volunteer missions to date. In this newsletter we look back at our **Stakeholders Conference in Hammamet**, Tunisia, our first large face-to-face gathering since the Covid pandemic. We'll also take check progress in our eco-incubators as they welcome their first intakes of young eco-entrepreneurs. Finally, we'll also get to know some of the young people in our **"Meet the entrepreneur"** section.

Happy reading!

## RESMYLE STAKEHOLDER CONFERENCE

Over 80 public, private and NGO participants from 5 partner countries attended our first face-to-face event to connect with RESMYLE and amplify the impact of training and **business creation support for jobs in the environment and sustainable development**. *Enrich, connect, accelerate* were the watchwords framing our successful Stakeholder Conference in Hammamet on 19 to 20 May 2022 designed to integrate RESMYLE actions and expertise into a larger ecosystem of support for NEETs. Resmyle champions inspirational "hands-on" learning experiences to boost youth employability but it can't do this all on its own. That's why the goal of this event was to build relations with other public, private and NGO partners, share experiences and expertise and ensure capitalisation of Resmyle eco-incubators to foster young entrepreneurial talent after the project ends.

## ECO-INCUBATORS: FROM MINDSET TO MARKET

*DEMARRI, [GROW UP!](#), Econitia, Green Construction Innovation Lab*: These strange names belong to our brand new network of small business support centres providing essential help for young people to turn their entrepreneurial ideas into a paying job. 2nd para: RESMYLE provides NEETs with a range of options for employment or training. Some have the ambition to start their own businesses from a clever idea for an environmental service or a sustainable product, so the eco-incubators are designed for them to assess their idea, advise and train them, to give them every chance of success.

## MEET THE ENTREPRENEUR

Among our first intake of young NEETs joining our eco-incubators, several first took part in our international workshops. One of them is 29 year-old **Asma Ghribi** from Tunisia. Asma is now receiving technical and soft skills support to grow her idea of a hydroponics business.

## ECO-INNOVATIVE EDUCATION PROJECTS: MEET NEET

RESMYLE provides small grants to local youth organisations to test out new and **original ways of engaging with young people**, especially those in vulnerable situations. One such initiative born **Napoli**, in Italy, used street art and music to channel young people's concerns about the future of the environment and living more sustainable lives under the slogan, "Time is up! We don't have a Planet B".

## RESMYLE IN JORDAN: PROMOTING LOCAL FOOD EXPERIENCES

The theme of our latest international workshop in Jordan was **designing local food experiences** for tourism and for food business ventures.

## RESMYLE IN ITALY: THE FUTURE AS A CULTURAL HORIZON

With war in Europe, rising prices and the growing climate crisis, there are plenty of reasons to despair but our last workshop in Italy looked on the bright side. **12 young NEETs explored the potential of arts, culture, peace and solidarity as subject areas for future careers** and their capacity as a platform to accept differences for a sustainable future for the planet.
